**Email:** [assimataya@gmail.com](mailto:assimataya@gmail.com)

**Website:** [www.assimataya.com](http://www.assimataya.com)

## SUMMARY

Full Stack Web Developer with a background in games programming. I'm a dedicated and passionate individual looking to fully transition into the world of web development. I am constantly striving to learn new skills and evolve my current knowledge of software development in order to achieve my goals of being a well equipped and capable developer.

## PROJECTS

### Facial Recognition App — *React, Node, PostgreSQL, Heroku*

A web-based application that can detect a face in an image, users will need to add an image URL into the input bar for the app to scan the image.

### Pokedex App — *React, Github Pages*

A web-based database that contains import battle data for all pokemon from generation 1 to 4. The app features a search bar to allow users to easily search for any pokemon they want.

### My Portfolio Site — *HTML, CSS, Github Pages*

My portfolio site was built using just HTML and CSS and deployed on github pages. The site features more in depth information about all my projects with links to the source code and the live version of the application.

## EDUCATION & CERTIFICATION

### Zero To Mastery — *Online.*

2022

The Complete Junior to Senior Web Developer Roadmap.

The Complete Web Developer.

### Kingston University — *London*
